MADE TO MEASURE

Our in house manufactured illuminated lightboxes create the perfect solution for businesses looking to make a striking visual impact. Crafted with attention to detail, these light boxes are designed to enhance the visibility and appeal of signage, making them ideal for retail environments, restaurants and various commercial spaces. We use advanced LED technology to ensure our lightboxes offer a bright and even illumination of graphics that ensures that the message stands out day or night.

PAVEMENT SIGNS

As we manufacture our pavement signs, we are able to ensure quality and can deliver products that effectively capture attention and withstand the rigours of outdoor environments. Our pavement signs are perfect for promoting businesses, events and special offers. Each sign easy to transport, set up and maintain while effectively drawing in foot traffic and increasing visibility.

FLOODLIGHTS

We also manufacture made to measure trough lighting kits, designed to provide a sleek and efficient lighting solution for a variety of applications. Using the latest LED technology, our kits offer bright, uniform illumination that enhances the visibility and appeal of signage. The energy-efficient LEDs not only reduce operational costs but also have a lower environmental impact.

Our banner pole kits are all made in-house to ensure the highest quality & durability. The kits are easy to install and come in a range of sizes and styles to suit different needs.

Similarly, our café barriers are made to enhance the functionality and visual appeal of outdoor seating areas. These barriers are not only sturdy and durable but also customisable to reflect the brand's identity. With options for printed graphics and different finishes, our café barriers can be tailored to fit the ambience of the establishment.

PANEL TRIM
FLEXIFACE
TRADITIONAL
MADE TO MEASURE

Our Panel Trim sign frames and Flexiface sign frames are manufactured in-house, ensuring top quality and consistency in every product.

The Panel Trim sign frames are designed for durability and versatility,

providing a sleek and professional look for various signage applications. Panel Trim is available in a variety of sizes and styles. Each frame is built to exact specifications, offering a high-quality finish. DIY lengths are also available.

Similarly, our flexiface sign frames serve a very similar function to Panel Trim but are designed to have a flexible PVC printed panel instead of a rigid panel and provide a robust solution to display your panel.

CNC ROUTING & PANEL CUTTING

Our CNC routing and panel cutting service is designed to meet the diverse needs of not just the sign industry but anyone requiring a precise and efficient cutting solution. Using our large format CNC machines, we offer unparalleled accuracy and consistency in cutting a variety of materials, including ACM, acrylic, aluminium, PVC foam and wood panels. Our advanced technology ensures that each cut is executed with precision, reducing waste and optimising material usage. Whether you need custom shapes, intricate designs, or standard cuts, our CNC routing service can handle complex projects with ease, delivering high-quality results every time.

LADDER RACKS
SHEET RACKS
WORKBENCHES

Our range of workshop equipment is manufactured at our Morecambe premises. Designed in house to ensure both functionality and practicality, each product is made from heavy steel & powder coated to ensure durability. Our range includes work benches with optional vinyl storage, mobile and wall mounted racks and wall mounted ladder rack.

BESPOKE

CUSTOMISED
PERSONALISED
TAILORED
UNIQUE
EXCLUSIVE

Whether it's custom dimensions, colours or a unique design, we ensure that every detail is addressed to deliver a product that fits your requirements.

Whilst we have an ever increasing range of 'stock' steel products, a very high proportion of our work is designing and producing one off or short run speciality sign brackets, heavy duty banner supports or very simple fascia support brackets.
